Fyi email received today. Yuti initiated the group that we are now. She then dropped off. She had been campaigning for some time for safer beaches.
Caroline

Dear Caroline,

I am very happy to report that so far from our end of Tyagarah Beach how wonderfully different is the energy at our lake our road our carpark and beach since signs were put up and police presence increased.....and four men were arrested in one week at lake shortly after the signs were put up. Am wondering if it also feels very different at your end of the beach? The carefully signed 200 metres from entrance nude area has stopped people being shocked as soon as on the beach and only healthy minded people seem to be attracted now.

Warm regards

Yuti
