QUESTIONS WITH NOTICE

Question With Notice No. 15.1 Lot 2 DP 445771 Coopers Lane West
File No: I2017/1662

At Council's Ordinary Meeting held on 26 October 2017, Duncan Dey asked the following question which was taken on notice:

"Has the current owner and has a prospective buyer of this property been given an indication that the two unapproved dwellings (for which an Order to Demolish was issued in June 2017 for execution in July) need now not be demolished and, if so, why?"

Response Director Sustainable Environment and Economy:

The Order to demolish was withdrawn as result of the owner entering into an undertaking to cease use of the dwellings and to progress a development application (DA) for their authorisation. There is a current Order in place to cease use of the dwellings that remains in place until a DA has been submitted and determined. The dwellings in the meantime have been vacated. The Order remains on the property even if the property is sold. The property owner, prospective purchasers and the sales agent are aware of the Order.

Question With Notice No. 15.2 Sand Quarry
File No: I2017/1663

At Council's Ordinary Meeting held on 26 October 2017, Matthew O'Reilly asked the following question which was taken on notice:

"Why has Byron Council failed to take enforcement action, impose significant fines and make an order to undertake full rehabilitation over the illegal unauthorised Sand Quarry at 150 Tandy's lane, beyond gaining an undertaking from the developer that they will not take any more sand from the quarry in the future and what are the circumstances by which Council has allowed this sand obtained illegally for substantial commercial benefit to remain on the Myocum site and not have it returned to the Tandy's lane quarry site where it was illegally obtained."

Response Director Sustainable Environment and Economy:

The present owner of the land comprising Wilson's sand quarry at 150 Tandys Lane Brunswick Heads inherited an existing lease agreement over the quarry. That lease agreement permitted a third party, with no interest in the land, to extract sand from the quarry. Therefore the land owner had no authority to have the quarry closed.

In April 2016 the land owner and his planning consultant sought advice from Council about closure of the quarry. At that time Council had reason to believe the quarry was being operated in accordance with continuing use rights which Council assessed to be a significant argument to be considered in any proposed enforcement action under the Environmental Planning and Assessment Act.

Council continued to carry out surveillance of the quarry.

As a result of a further complaint in October 2016 Council had reason to issue a proposed Protection of the Environment Operations Act Prevention Notice upon the operator of the quarry on 9 November 2016. After negotiations with the quarry operator Council was able to successfully facilitate closure of the quarry in January 2017 without the need for any enforcement action or litigation.

The quarry pit has been reshaped and the land owner has had discussions with Council about rehabilitation of the site, including establishment of a natural wetland. Council was not in a position to use the Environmental Planning and Assessment Act as a means of ordering rehabilitation of the quarry or the taking of punitive enforcement action.

Council has investigated the Myocum Road premises and is not in the possession of evidence to establish that a concrete batching plant or other similar type of business is unlawfully operating from those premises.

Question With Notice No. 15.3 Dangerous Dogs
File No: I2017/1664

At Council's Ordinary Meeting held on 26 October 2017, Angela Dunlop asked the following question which was taken on notice:

"Given that council's compliance priority program identifies dangerous dogs as a very high priority and given the recent spate of reported dog attacks in our shire why do compliance staff not have the common courtesy to acknowledge victims of attacks or indeed provide an update of punitive actions taken regarding dogs and their owners in response to the attacks. I am referring to actual, not alleged, incidents where photographic evidence was supplied to staff and where a dog owner admitted that his dog had indeed been involved in menacing a person. In fact, I have been attacked in three separate incidents in the past six months in South Golden Beach and New Brighton. Does one have to be hospitalised before these aggressive dogs are taken off our streets, parks and beaches? I am aware of many attacks that have gone unreported to council and is it any wonder, as many people do not have the faith that staff will follow through on their mandate to protect residents of our shire. One only has to cross our shire's boundaries into Tweed and Ballina shires to see that unleashed and roaming dogs are a rarity, as they are, in most developed countries throughout the world, yet in Byron shire they abound. Why is that so? Surely, it's time that all breaches of the Companion Animals Act were seriously enforced. A firm message needs to be sent to those who routinely and flagrantly breach these regulations. When will uncontrolled and aggressive dogs finally be given the highest of compliance priorities so that our community can rightfully and fearlessly reclaim our streets, parks and beaches?"

Response Director Sustainable Environment and Economy:

Council's Enforcement Team takes dangerous dogs and dog attacks as a serious matter and responds to all reported incidents as a high priority. This includes attacks of other animals as well as attacks of persons. There is no requirement for a victim to be hospitalised for Council to prioritise an incident.

Three recent examples of Council's approach to dog attacks are as follows:

On 15 August 2017, Council received notification that a dog attack of another animal had occurred in Federal. The complainant had not obtained the name or address of the dog owner but gave a description of the person to Council staff. As a result of enquiries by Council's Animal

and Enforcement Support Officer a male person was identified as the offender and as being in charge of a declared menacing dog at the time of the attack. The male person was issued a Court Attendance Notice for being in charge of a menacing dog which attacks and bites an animal. The owner of the declared menacing dog was issued a Court Attendance Notice for failing to comply with menacing dog requirements – i.e. no muzzle, no collar and not under effective control. Both matters were listed for a hearing at Mullumbimby Local Court where the two offenders both entered pleas of guilty. The Court gave the owner of the menacing dog a Section 10 and no monetary penalty. The person in charge of the menacing dog at the time of the attack was fined \$1,000, costs of \$500 and ordered to pay the veterinary expenses of the victim. Council wrote to the victim informing them of the Court Order and outlining the process to obtain the relevant funds. If Council had issued fines in relation to the offences, it is likely they would have been greater than those issued by the Court. However, as this matter related to an attack by a menacing dog, the legislation required the matter to go before the Local Court.

On 28 September 2017, Council received notification that a dog attack of other animal had occurred at Mullumbimby Creek. Council identified and located the owner of the offending dog. Council identified that the dog had been declared menacing by Lismore Shire Council. The dog was seized by Council staff and held at Council's pound until the dog was surrendered by its owner. The dog was euthanized on 5 October 2017. The owner was issued a fine of over \$1,300 for failing to comply with menacing dog control requirements. During this process the complainant was informed of all steps taken by Council staff. The complainant and another person advised Council, in writing, that they were very happy with the outcome.

On 29 September 2017, a female tourist was attacked by a dog on New Brighton Beach. The victim of the attack reported the incident to the police who forwarded the job to Council. Council contacted the victim who provided descriptions of the dog but was unable to identify/describe the dog owner. Despite this, Council's Animal and Enforcement Support Officer investigated the incident and identified the owner. The owner initially denied involvement in the incident but further steps by Council's Animal and Enforcement Support Officer resulted in the owner providing a full statement to Council and an intention to fully compensate the victim. The victim was updated on each step of the investigation – she was visited in person by Council staff on at least four occasions and spoken to via telephone by Council staff on at least eight occasions. The victim requested the full details of the dog owner and was provided with those details by Council so that she could pursue civil action. Council issued an Intention to Declare the dog Menacing in NSW and the owner was issued with fines of over \$1,600. Local police and the victim have advised Council, in writing that they are very happy with the outcome and the support that Council provided during the investigation. The actions by Council resulted in the dog owner being fined more than recent Court decisions and in the dog being subject to future control requirements to ensure safety of the community.

Since **1 January 2017**, Council have responded to 48 dog attacks, 437 complaints of nuisance dogs/barking dogs, 8 complaints of nuisance dogs/unrestrained dogs, 177 missing dogs that were located and 10 miscellaneous dog complaints. During this period Council's two Animal and Enforcement Support Officers have also undertaken 137 patrols of off-lead and on-lead dog exercise areas within the Shire.

Between **1 January 2017 and 31 October 2017**, the following fines were issued by Council in relation to dogs:

- Seven fines for dog not wearing collar tag
- Seventeen fines for dog not under effective control in public place
- Two fines for greyhound not muzzled in public place
- Five fines for dog not under control in prohibited place
- Seven fines for failing to prevent dog from escaping
- Twenty-six fines for failing to register dog

Seven fines for failing to comply with a nuisance order
Six fines for dog rushes/attacks
One fine for dangerous/menacing dog not under control
One fine for failing to comply with menacing dog requirements
Five warning notices in relation to dogs and over 100 verbal warnings relating to dogs off-lead (educational) were also given during this period.

Education is also a key component of the work that the team undertakes. A current initiative with regard to responsible pet ownership is the school calendar colouring competition which will result in the calendars printed and available free of charge at a range of places around the Shire including libraries. It will be a year-long reminder about the importance of being a responsible pet owner. See <http://www.byron.nsw.gov.au/responsible-pet-ownership>

Further to the above, the team has been contacted recently by other councils about our policies and processes (operating procedures) about dogs, as they see Byron as a exemplar council given work loads and resourcing. Staff are to be commended in this regard.

Question With Notice No. 15.4 Byron Bypass
File No: I2017/1665

At Council's Ordinary Meeting held on 26 October 2017, John Anderson asked the following question which was taken on notice:

"Given the stringent conditions attached to the Court's approval of the wetlands portion of the Byron Bypass;

- i. What is Council's latest estimate of the total cost of the project and the timeline for completion;
- ii. What processes must Council follow in assessing the Butler Street portion of the Bypass in terms of a Part V Application? (SEPP); and,
- iii. Who is to prepare the application and take the final determination?"

Response Director Infrastructure Services:

What is Council's latest estimate of the total cost of the project and the timeline for completion

The latest cost estimate for total project cost is \$22.5 million.

Completion of the project will be subject to obtaining additional funding. The timing for additional funding is unknown.

What processes must Council follow in assessing the Butler Street portion of the Bypass in terms of a Part V Application? (SEPP)

The key requirements for an application under Part 5 of the *Environmental Planning and Assessment Act 1979 (EPA Act)* are that a determining authority is to examine and take into account to the fullest extent possible all matters affecting or likely to affect the environment by reason of an activity. The examination and account of those matters takes the following form:

1. A written assessment, known as a "Review of Environmental Factors" (**REF**), is undertaken. The REF has been prepared by GHD.
2. The REF is the document that records the examination and account of effects of the environment under

Part 5 of the EPA Act. The REF considers the following matters (in summary only):

- a. *An assessment of whether there is likely to be a significant effect on the environment (including critical habitat) or threatened species, populations or ecological communities, or their habitats (section 112 of the EPA Act). If so, an Environmental Impact Statement (EIS) is required. In respect of the REF prepared for the Butler Street portion, it has been determined that there is not likely to be a significant effect on the environment and as such it has been determined that an EIS is not required.*
 - b. *The REF examines and takes into account to the fullest extent possible all matters affecting or likely to affect the environment by reason of the Butler Street portion of the bypass (section 111 of the EPA Act).*
 - c. *The REF considers a list of prescribed factors which must be considered in determining the impact of a proposal on the environment, as set out in clause 228 of the Environmental Planning and Assessment Regulation 2000 (EPA Regulation).*
3. *In light of these matters and requirements, the REF considers a broad range of matters in respect of the Butler street portion of the bypass, including acoustic impacts, proposed acoustic measures, associated heritage considerations, community submissions in respect of the proposed bypass, landscape character, visual impacts, social and amenity impacts.*

Who is to prepare the application and make the final determination?

The REF has been prepared by GHD.

For the purposes of Part 5 of the EPA Act, Council as the proponent of the activity is the "determining authority" with respect to the carrying out of the Butler Street portion of the bypass. Council is required to determine whether the requirements of Part 5 of the EPA Act have been satisfied having regard to the assessment carried out in the REF.

Some discrete parts of the Butler Street proposal require separate approvals from the Heritage Council and the RMS.

In those circumstances RMS and the Heritage Council also fit within the definition of "determining authorities" for the assessment under Part 5 of the EPA Act. For example, the Heritage Council becomes a "determining authority" under Part 5 of the EPA Act when assessing the application for approval under section 57 of the *Heritage Act 1977*, which relates to works within the curtilage of the Byron Railway Station and yard group, which is listed on the State Heritage Register.

Although RMS and the Heritage Council fall within the definition of "determining authorities", there is an exception that applies to the application of Part 5 given that Council has already undertaken the REF.

Section 110E(c) of the EPA Act provides that determining authorities are not subject to the key requirements of Part 5 of the EPA Act (sections 111 and 112) if an activity has been approved, or is to be carried out, by another determining authority (in this case, Council) after environmental assessment has already occurred under Part 5. RMS and the Heritage Council are likely to decide that section 110E(c) applies to its assessment such that they are not required to make a separate assessment under Part 5.

The meeting closed at 6.10pm.
