

Mr Andrew Stone  
Senior Project Manager  
Reflections Holiday Parks  
PO Box 212  
CARRINGTON QLD 2294

19 December 2018

Dear Mr Stone

### Clarkes Beach Midden Protection Works

I am writing to advise that at its December 2018 meeting the NPWS Byron Coast Area Management Committee decided that rock wall protection of the Clarkes Beach midden is no longer required due to the outcomes and recommendations of the recent archaeological study.

Understandably, this will have implications for finalising design of protection works for the gully between the Holiday Park and the Cape Byron State Conservation Area. NPWS maintains its interest in this project as it will reduce impacts on the State Conservation Area and the littoral rainforest endangered ecological community which occurs around the gully, and which are both protected by legislation.

NPWS is also pursuing its long-standing interest in diverting the stormwater from Lighthouse Road which currently flows through the gully and is addressing this matter with Byron Shire Council.

NPWS will provide comment on the project designs once they are amended to remove rock wall protection for the midden and the designs are able to be considered by the Byron Coast Area Management Committee.

Please contact me on (02) 66398300 or [sue.walker@environment.nsw.gov.au](mailto:sue.walker@environment.nsw.gov.au). if you wish to discuss this matter.

Yours sincerely

**SUE WALKER**  
Area Manager Tweed Byron Area  
North Coast Branch
