

Former Mullumbimby Hospital Site Enquiry By Design Primer Pack

Byron Shire Council

WHO WE ARE

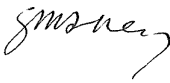

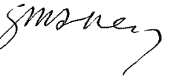

HIP V. HYPE Sustainability provides advice that is commercially grounded, yet ambitious. We pursue exceptional outcomes that are socially, economically and environmentally sustainable and enable action across government, institutions and organisations.

We seek to partner with those who are willing to think strategically to achieve better. We lead, collaborate and support others to deliver impact and build Better Cities and Regions, Better Buildings and Better Businesses.

Purpose and Agenda

The Mullumbimby Township has multiple layers of identity, ranging from traditional use of the land by the Arakwal people of the Bundjalung Nation, early European settlement, counter-culture of the 60s and 70s and more recently an evolving mix of people with a shared value of what makes Mullum unique. This identity is highly valued by the local community at the same time as there is growing recognition of increasing housing affordability issues in the region, which prompts the need to diversify housing options.

Re-development of the Mullumbimby hospital site is a key opportunity to improve housing and community infrastructure outcomes locally, through a site-responsive design which has strong social license from the community.

To guide the site's redevelopment, Byron Shire Council is leading an Enquiry by Design (EbD) process - seeking stakeholders' input into the project's conceptual design to ensure it benefits from a range of technical and local knowledge.

This 'primer pack' is intended to be read by participants in preparation for the EbD process. Please take time to read over a cuppa and mark up any notes or thoughts to unpack on the day!

PURPOSE

The purpose of the EbD process is to ensure knowledge held by key stakeholders influences the design process and fosters stakeholder ownership of the outcomes.

The EbD process will include:

- A rundown of previous work done to-date, including the technical assessments, strategies and community consultation led by Council
- Confirming the project's driving Vision and Principles
- A Site Visit to analyse the project's opportunities and constraints
- Active engagement in the project's conceptual designs, based on five key themes (see below)
- A presentation of the project's conceptual designs based on the outcomes of the EbD session

The work leading up to this EbD process has included a review of relevant Council policies and strategic documents, as well as project-specific technical assessments (e.g. biodiversity, bushfire, transport etc.) This has led to the development of five key themes that will inform discussions in the EbD Session:

- Transport and Access
- Housing and Built Form
- Blue and Green Infrastructure
- Climate
- People and Culture

Each of these key themes are explored further throughout this Primer Pack. The strategic and technical work that informed these themes will be discussed further in Day 1 of the EbD process.

AGENDA

When: 13 November - 14 November, 2023

Where: Mullumbimby Civic Memorial Hall, 55 Dalley St, Mullumbimby

Day 1

TIME	AGENDA
9.45 - 10 AM	Participants arrive
10 - 10.45 AM	Acknowledgment of Country, Welcomes and Introductions
10.45 AM - 12.30 PM	Activity 1: Establish the Context and Vision
12.30 - 1.30 PM	Lunch and Travel Time to Site
1.30 - 4 PM	Activity 2: Site Visit and Analysis

Day 2

TIME	AGENDA
9.45 - 10 AM	Participants arrive
10 AM - 12.30 PM	Activity 3: Designing the site
12.30 - 1.30 PM	Lunch
1.30 - 4 PM	Activity 4: Refining the Outputs
4 - 4.15 PM	EBD Finalisation

Key Themes

Transport and Access

Site Context

Legend

Site boundary

Water pipeline

Access points into site (car)

Access points into site (pedestrian)

Existing shared path

Existing bus stop (approx. 160 metres south-east)

Transport and Access

Precedents

CAR PARKING AND INFRASTRUCTURE

- 1. Car sharing infrastructure to support a reduction in car ownership and promote alternative sustainable forms of transport.
- 2. Shared road zones with low speed limits and artwork. Girrwaa road mural by Gumbaynggirr and Bundjalung artist Otis Hope Carey.
- 3. Promote electric vehicle use with communal EV charging stations. Cobe charging station Frederica Denmark. Image by Rasmus Hjortshøj.
- 4. Permeable paving to vehicle access ways, car parks and roads to improve drainage and growth of greenery. Charles House by Austin Maynard Architects.

3

Transport and Access

Precedents

INCLUSIVE AND ACCESSIBLE PATHS AND WAYFINDING

- 1. Raised walkways to limit the disruption of existing vegetation. Farum Midtpunkt by Henning Larsen.
- 2. Ensuring paths are designed to be inclusive and accessible, with gradients that account for the public realm's natural topography. Barcode by MVRDV. Image by Liam Wallis.
- 3. Meandering pathways between homes. ZE-05 by Zander Roth. Image by Michael Feser
- 4. Permeable paving to pathways to improve drainage and allow for landscaping opportunities.

Housing and Built Form

Site Context

Legend

Site boundary

Water pipeline

8m wide water pipeline easement

Up to 3 Storeys (11.5 m) residential development

Target of 20% affordable housing with mixed typologies (Planning Proposal 26.2023.2.1)

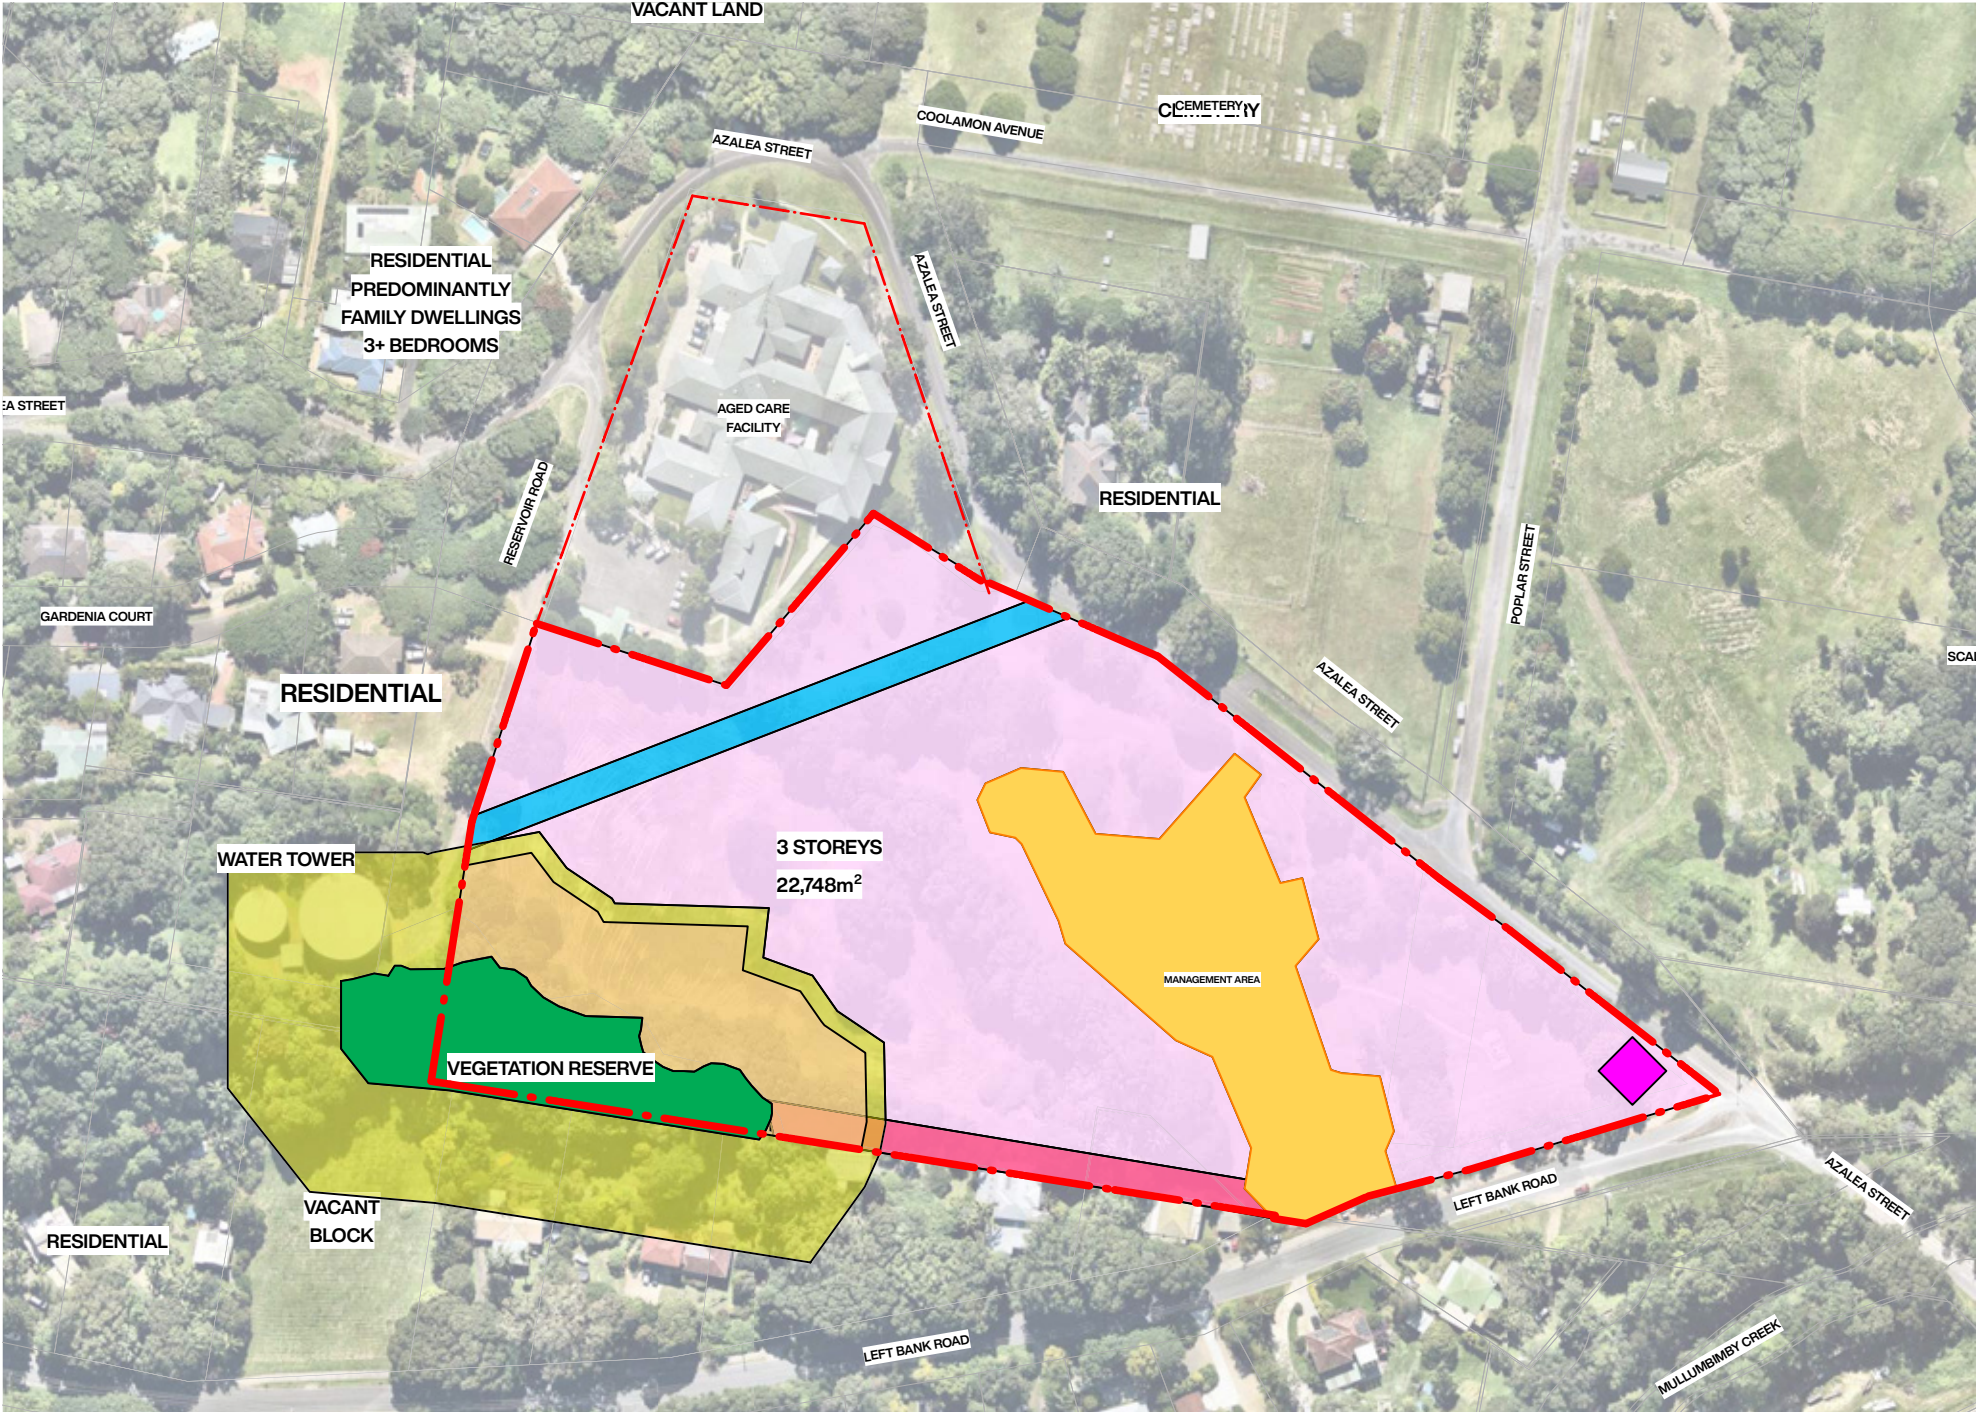

Management area*

Building separation zone to lots on southern boundary

Potential landmark built form

30 metre buffer from Subtropical Rainforest

*Allowable uses include: Daycare, Preschool, Primary school
 High school, Residential land use with minimal opportunities for soil access,
 Public open spaces, Commercial land use
 (Site Strategy and Urban Design Protocol - Former Mullumbimby Hospital Site)

Housing and Built Form

Precedents

- MEDIUM DENSITY HOUSING & ALTERNATIVE HOUSING MODELS**
- 1. 17 homes over 3 levels with basement car parking. Forest House Bendigo, by Austin Maynard Architects. Image by Meche.
 - 2. 14 homes over 3 levels with basement car parking. Slate House, by Austin Maynard Architects. Image by Tess Kelly.
 - 3. 27 homes over 2 levels with shared amenities. The Paddock Ecovillage, Castlemaine, by Crosby Architects. Image by The Paddock
 - 4. 31 homes over 2 to 3 levels. The Village, Daylesford by Breathe Architecture. Image source from Hygge Property

Climate Site Context

Legend

<div><div></div><div></div></div>	Site boundary
<div><div></div><div></div></div>	Water pipeline
<div><div></div></div>	Bushfire asset protection zone 25m APZ (residential non-SFPP)*
<div><div></div></div>	Bushfire asset protection zone 81m APZ (SFPP)*
<div><div></div></div>	Bushfire asset protection zone 20m APZ (SFPP)
<div><div></div></div>	Bushfire asset protection zone 18m APZ (SFPP)
<div><div></div></div>	Bushfire inner protection zone
<div><div></div></div>	100 Year Flood (Site Strategy and Urban Design Protocol - Former Mullumbimby Hospital Site)

*Special Fire Protection Purpose Developments (SFPP) are a class of building whereby the occupants may be more vulnerable to bushfire attack (including schools, childcare centres, retirement villages and other purposes described in the Rural Fires Act 1977). Accordingly, additional measures are typically required for these classes of buildings in comparison to non-SFPP buildings (<https://www.rfs.nsw.gov.au/plan-and-prepare/building-in-a-bush-fire-area/additional-information>).

Climate Precedents

RESOURCE EFFICIENCY

- 1. Opting for locally-sourced, recycled building materials. Revival Studio, Melbourne. Image by Kim Landy.
- 2. Rooftop PV's for solar energy capture. Terrace House by Austin Maynard Architects. Image by Derek Swalwell.
- 3. Passive design principles to improve building efficiency. ParkLife by Austin Maynard Architects. Image by Tim Ross.
- 4. Re-using rainwater for irrigation. Terracotta House by Austin Maynard Architects. Image by Derek Swalwell.
