Q2. **Email:**

Q3. **Do you have any feedback on the draft Action Plan?**

I am from Ballina, and dont see much mention of this area. I believe that grey water could be offered to existing premises, and in addition could be recycled to drinking water as they do in London etc.

Q3. **Do you have any feedback on the draft Action Plan?**

BSC and the emissions reduction team should be congratulated on this comprehensive and well integrated plan, if it can all be brought to fruition it will make a significant difference! It is unfortunate that the public is still largely unaware of how much BSC is doing to lower emissions for their operations. I hesitate to add more suggested actions as there is so much in this already but as a member of Zero Emissions Byron we would love to see more actions from council to encourage, educate and regulate the buildings and developments in Byron Shire. We see things like black roofs, very little passive solar design with energy & water wasting design common that is still happening. We would love to see more done through all of councils points of contact and levers.

Q1. **Name:** Rod Hornby

Q2. **Email:**

Q3. **Do you have any feedback on the draft Action Plan?**

Has the council investigated a Power Purchase Agreement with a Renewable Energy Generator or Retailer ? It is possible to use these arrangements to move to 100% renewable energy faster than your current timeline without Council needing to build it's own generation facilities.
